Subway Surfers is a classic endless runner game. You play as

Jake, who surfs the subways and tries to escape from the grumpy Inspector and his dog.

You'll need to dodge trains, trams, obstacles, and more to go as far as you can in this endless running game. Collect coins to unlock power-ups and special gear to help you go further every time in Subway Surfers. Furthermore, coins can be used to unlock different characters and boards. With your keys you can customize the characters and upgrade your hoverboards with special powers. Don't forget to complete the awards, since they give you keys. In 'MyTour' you can collect rewards from completing daily Word Hunts. You can also find missions there. Subway Surfers was created by Sybo in 2012. And till this day it is one of the most popular games online!

Subway Surfers went

HTML5, so you can play the game now on your mobile phone and tablet online in your browser exclusively on Poki. Next to that, you can still enjoy playing Subway Surfers on your PC. You can play the game for free without downloading it. If you are interested in games similar to Subway Surfers, have a look at our Running Games. Enjoy surfing here on Poki!

What is the latest world?

Ho ho ho! It's the most wonderful time

of the year once again! We're leaving London behind and are going to pay a visit to the winter wonderland of the North Pole. It may be cold and snowy, but there's a lot to see and explore! Set out for the ice caves or have a look at the gift factories. Visit the cozy villages or take a look inside of an igloo. It's going to be a white Christmas for sure! Happy Holidays, surfers!

How to play Subway Surfers online?

You play this game on

Poki by using your keyboard:

Left/right arrow - Move left/right

Up arrow - Jump

Down

arrow - Roll

Space - Activate hoverboard

Can you play Subway Surfers online for free on a computer?

Yes! You can play the game for free in your browser without having to download the game. Play Subway Surfers using your keyboard and mouse. You can even access full-screen mode on your PC.

La turbulencia en los vuelos: ¿por qué causa lesiones y cuál es su relación con el cambio climático?

La mayoría de nosotros ha experimentado turbulencias durante los vuelos: cuando el avión atraviesa cuerpos de aire en movimiento a velocidades considerablemente diferentes.

La turbulencia grave puede poner nervioso incluso al pasajero más experimentado y hacer que cinco minutos parezcan una eternidad. Por lo general, resulta en un viaje accidentado, pero en los peores casos puede causar daños, lesiones e incluso, como en el vuelo SQ321 de Singapore Airlines del 21 de mayo, la muerte.

En accidentes no fatales, la turbulencia es la causa principal de lesiones en tripulantes de cabina y pasajeros, según la Administración Federal de Aviación (FAA), y es uno de los tipos de accidentes aéreos más comunes en la actualidad, según la Junta Nacional de Seguridad del Transporte de EE. UU. Le cuesta a las aerolíneas estadounidenses -debido a lesiones, retrasos y daños- hasta 500 millones de dólares al año, según el Centro Nacional para la Investigación Atmosférica.

Escala de medición de la turbulencia

"Existe una escala para medir la fuerza de la turbulencia", dijo Paul Williams, profesor de ciencia atmosférica en la Universidad de Reading en el Reino Unido, en 2024. "Hay turbulencia ligera, que es una tensión contra el cinturón de seguridad, pero el servicio de alimentos puede continuar y probablemente pueda caminar por el pasillo, quizás con dificultad.

Luego está la turbulencia moderada, una tensión definida contra el cinturón de seguridad, cualquier cosa que no esté asegurada se desplazará, y caminar es difícil; a los asistentes de vuelo generalmente se les instruye para que se abrochen el cinturón de seguridad.

La peor es la turbulencia grave: es más fuerte que la gravedad, por lo que puede inmovilizarlo en su asiento y, si no BR su cinturón de seguridad, será arrojado dentro de la cabina. Este es el tipo de turbulencia que causa lesiones graves, como fracturas óseas, por ejemplo."

Golpea rápido y sin pistas visuales

Aproximadamente 65.000 aeronaves sufren turbulencia moderada cada año en los EE. UU., y alrededor de 5.500 experimentan turbulencia grave. Sin embargo, estos números pueden estar destinados a aumentar.

Williams cree que el cambio climático está modificando la turbulencia y comenzó a estudiar el tema en 2013. "Realizamos algunas simulaciones por computadora y descubrimos que la turbulencia grave podría duplicarse o triplicarse en las próximas décadas", dijo.

Los hallazgos, que más tarde fueron confirmados por observaciones, destacan un tipo de turbulencia llamado "turbulencia de aire claro", que no está conectada a ninguna pista visual, como tormentas o nubes. A diferencia de la turbulencia regular, golpea repentinamente y es difícil de evitar. El vuelo de Singapore Airlines del 21 de mayo no fue golpeado por turbulencia de aire claro, sino por tormentas eléctricas en rápido desarrollo.
